Dear Jamie

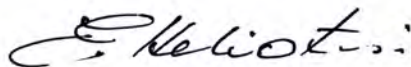

On behalf of the National Australia Bank Ovarian Cancer Research Foundation, we would like to sincerely thank you for your commitment to the Foundation. Your ability to develop, manufacture and deliver such a beautiful Donation Statue has certainly provided the Foundation with the right vehicle for raising awareness of this insidious disease. It has been a privilege to work with you and must applaud your enthusiasm and assistance.

All monies raised will go directly to our research endeavours.

Ovarian cancer is a silent killer in our society, with **one woman every ten hours dying from this disease in Australia**. A staggering 75% of cases are diagnosed within the late stages of the disease, resulting in a tragically high mortality rate. Ultimately, the Foundation's goal is to ensure that an early detection test becomes as readily available and habitual as a pap smear or breast examination in every woman's regular medical check up. Early detection of this disease would drastically change the current devastating statistic.

We thank you again for your continued and ongoing support. If you would like any further information, please contact the Foundation office on (03) 9296 2040 or visit our website www.ocrf.com.au

Yours sincerely

LIZ HELIOTIS
